PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 2+ years of professional experience architecting and shipping 25+ Flutter codebases, including 10+ production applications live on the Google Play Store, reaching 8K+ active users. Specializes in Clean Architecture, Cubit state management, and REST API integration, with a track record of building coordinated customer / driver / provider app ecosystems for ride-hailing, delivery, and marketplace platforms. Experienced with Firebase, Google Maps, Moyasar payment integration, and translating Figma designs into pixel-perfect, high-performance interfaces — consistently delivering production-ready code within agile team environments.

Flutter Developer — Nahr Development

Cairo, Egypt · Oct 2024 – Present

- **Architected and shipped 25+ Flutter codebases** for Nahr Development, including **10+ applications live on Google Play Store** (Motah, Primo, Fresh Market, Rabbito, Car Brake & more) across ride-hailing, delivery, e-commerce, and on-demand service verticals.
- Reduced average UI rendering time by **~30%** through systematic performance profiling, widget tree optimization, and lazy loading strategies across multiple apps.
- Integrated Firebase services (Authentication, Cloud Firestore, Push Notifications) across 5+ apps, enabling real-time data sync and improving user retention through targeted notifications.
- Implemented Clean Architecture with Cubit state management, reducing bug rate and improving codebase maintainability — enabling faster onboarding of new team members.
- Delivered pixel-perfect UI for 10+ apps by converting Figma designs into responsive Flutter interfaces, achieving **95%+ design fidelity** across Android screen sizes.
- Integrated third-party services including Moyasar Payment Gateway and Google Maps & Location Services, reducing feature delivery time by reusing modular integration layers.
- Collaborated with cross-functional teams using Jira, Trello, and GitHub — contributing to sprint planning and maintaining a **100% on-time release rate** for production deployments.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Android SDK, Cross-platform Development
State Management	Cubit, BLoC, Provider, Flutter Riverpod (familiar)
Architecture	Clean Architecture, MVVM, Repository Pattern, Dependency Injection
Backend & APIs	REST API Integration, Dio, Firebase (Auth, Firestore, FCM), JSON Parsing
Payments & Maps	Moyasar Payment Gateway, Google Maps API, Geolocation Services
DevOps & Tools	Git, GitHub, Postman, Jira, Trello, Figma, Android Studio, VS Code
Testing	Unit Testing, Widget Testing, Flutter DevTools, Performance Profiling

Motah — On-Demand Car Services

Car maintenance booking platform with service selection, scheduling, and technician dispatch.

Flutter • Cubit • REST API • Firebase FCM [Play Store ↗](#)

Primo

customer + driver apps

Dual-mode ride-hailing and last-mile delivery platform with live location tracking and push notifications, shipped as coordinated customer and driver apps.

Flutter • Cubit • Google Maps API • Firebase Auth • REST API [Primo ↗](#) [Primo Driver ↗](#)

Fresh Market

customer + driver apps

Multi-vendor grocery and shopping platform with product catalog, cart, and order tracking, paired with a dedicated driver app for delivery fulfillment.

Flutter • Clean Architecture • Cubit • REST API • Firebase [Fresh Market ↗](#) [Fresh Drivers ↗](#)

Car Brake

customer + provider apps

On-demand car valet, washing, and covered parking service — QR-code vehicle handoff and live parking timers, with a companion app for valet staff managing requests.

Flutter • Cubit • REST API • Firebase [Car Brake ↗](#) [Car Brake Provider ↗](#)

Rabbito — Marketplace & Delivery App

Multi-vendor shopping and delivery app featuring product catalog, cart, and order tracking with in-app payments.

Flutter • Cubit • Moyasar • REST API • Firebase [Play Store ↗](#)

NAS Sports — Academy Management App

Sports academy management app — player schedules, coach profiles, skill-level tracking, and session attendance.

Flutter • Cubit • REST API • Firebase Firestore [Play Store ↗](#)

Etqan — Production App

Flutter application designed, built, and shipped for Nahr Development.

Flutter · Cubit · REST API · Firebase [Play Store](#) ↗

Plus 15+ additional Flutter apps across ride-hailing, delivery, and marketplace verticals — each shipped as coordinated customer, driver, and/or partner apps, including TaxiQ & TaxiQ Rider, Rabbit / Rabbit Driver / Rabbit Partners, Q Service & Q Service Driver, OctoBoss & OctoBoss Labor, HiPro, Nagaa / Nagaa Partner / Nagaa Delivery, Turtle Delivery, WAWAN & Wawan Coach, Sonic, and Iplace.

EDUCATION

Bachelor of Science, Management Information Systems (MIS)

2018 – 2021

High City for Administration and Technology · Shabramant, Giza, Egypt

LANGUAGES

Arabic — Native Proficiency

English — Professional Working Proficiency
